

Kill Doctor Lucky User Manual

In order to play the game please visit our website <https://kill-doctor-lucky.herokuapp.com/> or pull the source code from <https://github.com/arevi/Kill-Doctor-Lucky-Web-Port> and host it yourself.

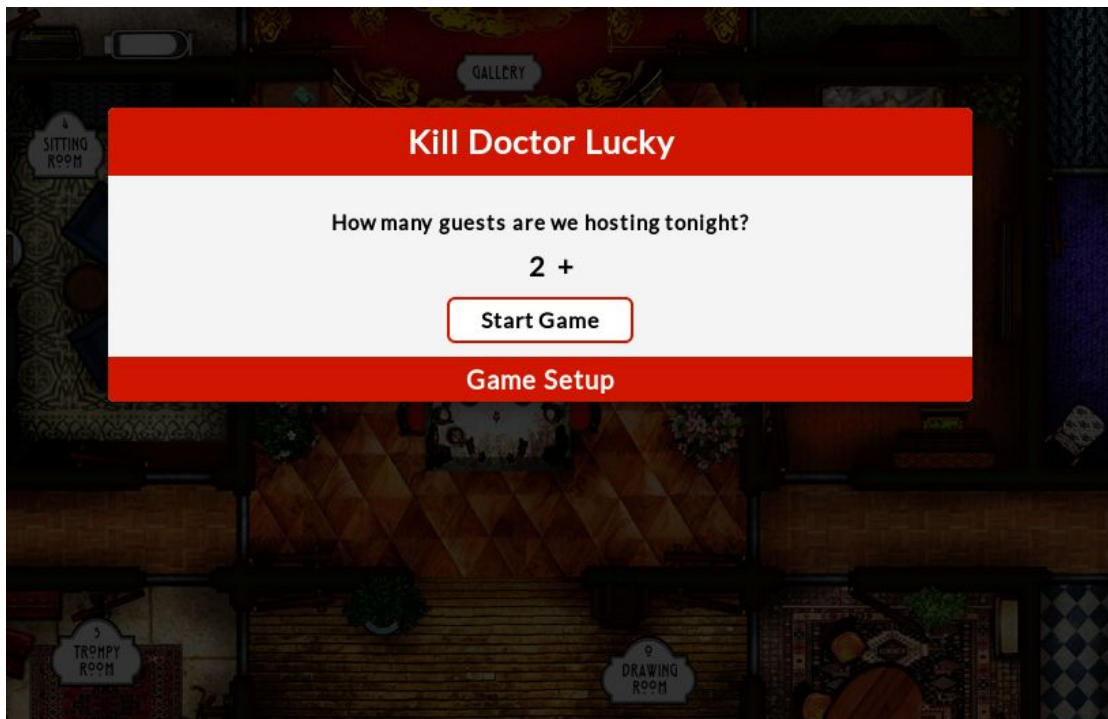

Once the website is loaded the setup menu will appear. Here you can choose to play online version of the game where each player has their own device, or a local version of the game where all players use the same computer.

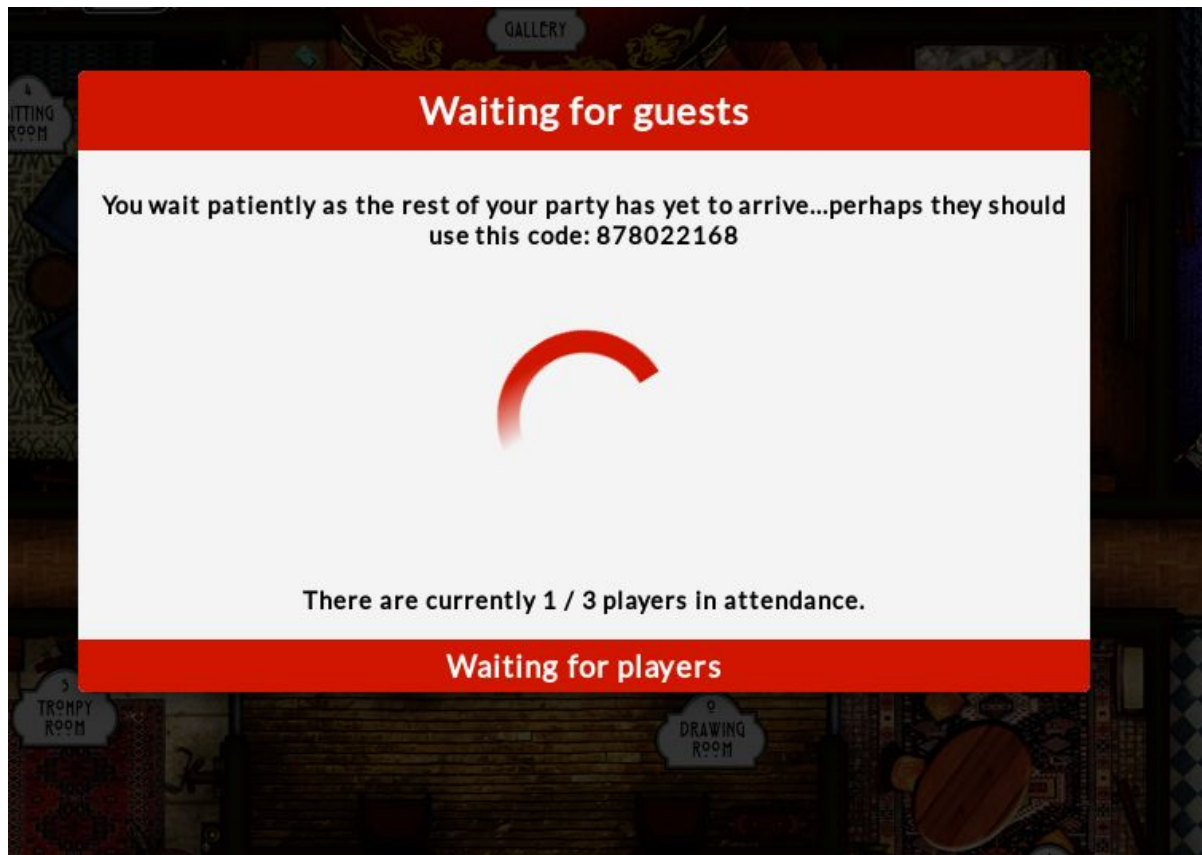

When choosing the online version of the game you will then be asked if you would like to join a game or make a new one.

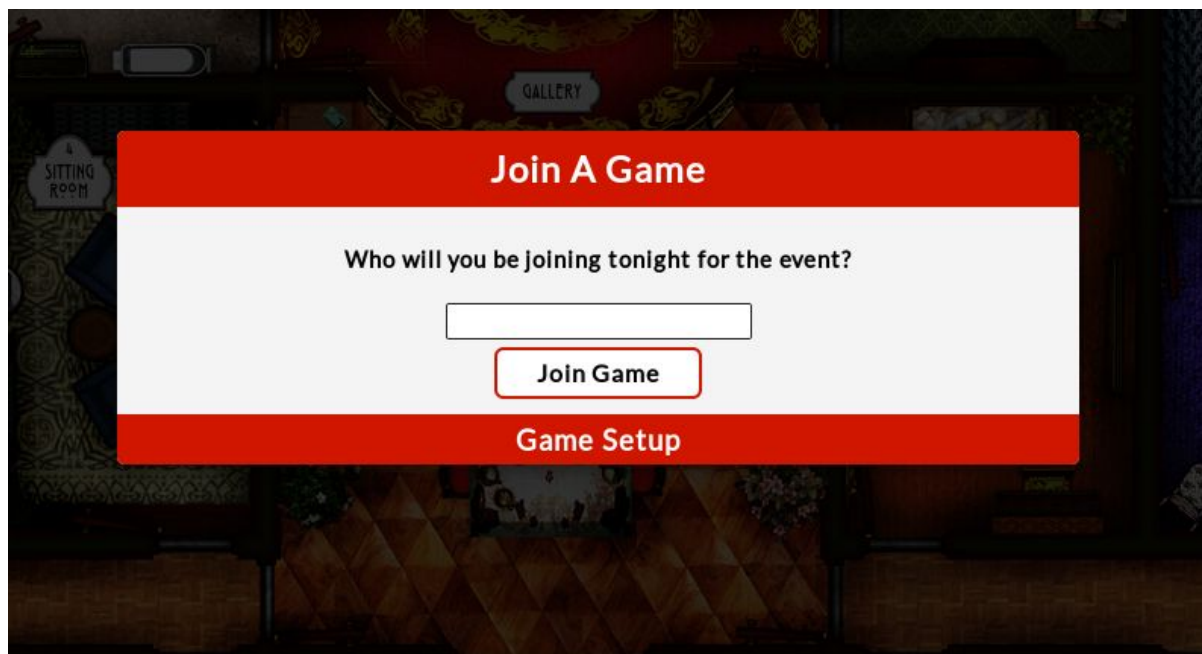

When creating a new game, you will be asked to select the number of players.

Once the number of players has been selected, the user will be issued a code that can be used by the other players to join the game.

When joining a game, use the code issued to the games creator and type it into the text box

Once all players have joined the game will begin.

Kill Doctor Lucky

Round: 1

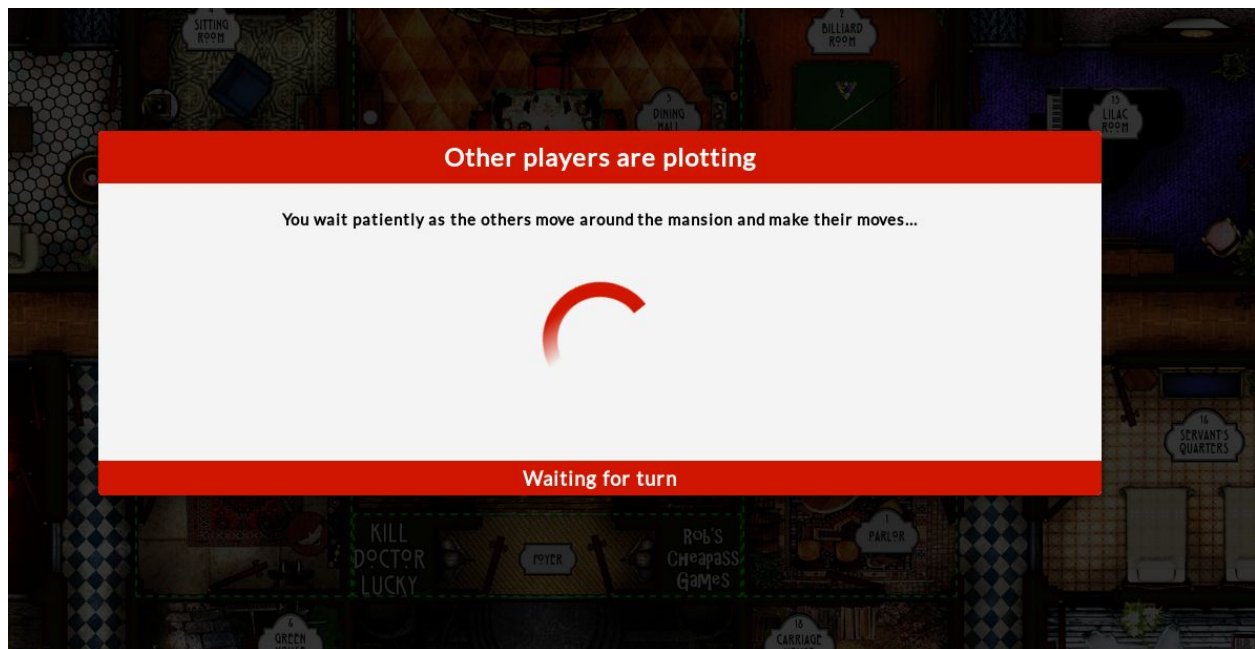

It's Player 1's turn!

Kill

End Turn

In the game screen we can see whose turn it is in the top right as players locations and spite levels in the top left. In the bottom right we have the kill and end turn buttons respectively. To end your turn and advance the game press the end turn button.

Selecting rooms: Players can move one room at a time around the map. Available rooms are highlighted in green, and to move to one, simply click on it.

Waiting for other players: When this dialog is displayed it is another player's turn. Simply wait for other players to complete their turn and the dialog will automatically disappear.
